6:00 p.m.

**Controversies in Implant Prosthodontics:
Everyday Treatment Planning Decisions**

Program Fee: Complimentary - 2 hours CE Credit

PROGRAM DESCRIPTION:

The implant dentist and patient still want the same things: restorations that look good, done as quickly and affordably as possible and remaining trouble free over the long term. This program will address the treatment plans that have allowed these positive outcomes over the last 30 years and contrast them with those that have had less optimum outcomes. Likewise implant strength, antirotational features, torque control, and occlusion unique to contemporary implant systems will be discussed. Particular emphasis will be given to practical applications of digital technology to make procedures quicker and easier. Clinically relevant research conclusions on early and immediate loading will be highlighted. Current controversies on tilted implant protocols, bioactive surface coatings, immediate provisional restorations, splinting, and screw vs. cement retention will be emphasized.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe the current controversies in implant dentistry and understand the published literature that addresses these controversies.
- Understand the forces acting on contemporary implant restorations and recognize the specific clinical problems that these forces may cause.
- Implement clinical strategies to help avoid biomechanical overload of implant restorations.
- Implement practical methods to assure safe, consistent and affordable implant esthetics, even with accelerated loading protocols.

Edwin A. McGlumphy, DDS, MS

Edwin McGlumphy

Dr. McGlumphy received his dental degree, as well as Certificates in Advanced Prosthodontics from The Ohio State University, College of Dentistry, Columbus, Ohio, where he is currently the Professor Emeritus of Restorative and Prosthetic Dentistry. He is a referee for the Journal of Prosthetic Dentistry and has published many articles on implant dentistry. From 1988 until 2019, Dr. McGlumphy maintained an intramural faculty practice at The Ohio State University College of Dentistry, with an emphasis on fixed, removable, and implant prosthodontics. He is currently Clinical Director at the Columbus, Ohio ClearChoice Dental Implant Center with a focus on full-arch, immediate load implant-supported restorations.

Notes from the President

Tim McConnell

Dear Colleagues,

Thank you for your participation in the first ever SDDS Zoom Webinar that was held on Thursday, September 17th. We had a good number that signed on to gain their two hours of free continuing education credits. We appreciate Zimmer Biomet for their continued support in helping us offer quality continuing education at minimal to no costs to our members and their staffs.

While we are sad to announce that the Earl Henry Memorial is canceled we will still be bringing you an opportunity to gain two hours of CE at no cost, again thanks to Zimmer Biomet for making this possible. The date for the next virtual webinar is October 22nd. Please watch your emails for the invitation link.

Sincerely,
Tim McConnell

Chemical Dependency & Prescription Writing

1 hr CE | \$25 member dentists & staff | \$55 non-members & staff

Tennessee dentists and their dental teams can obtain one hour of C.E. by viewing the Chemical Dependency & Prescription Writing webinar presentation below. A minimum of 2 of the biennial hours must be obtained in the area of chemical dependency education.

TN Law Will Require Electronic Prescriptions for Controlled Substances in 2021

State and federal laws mandate the use of electronic prescriptions for controlled substances beginning on January 1, 2021. This law applies not only to Schedule IIs but also includes any prescription for a Schedule III, IV, or V.

Several exemptions exist including but not limited to prescriptions:

- issued where electronic prescribing is not available due to technological or electrical failure;
- Issued by a prescriber to be dispensed by a pharmacy located outside the state, and

Issued by a prescriber who issues fifty or fewer prescriptions for Schedule II controlled substances per year (*not all prescriptions for all schedules.*)

The TDA has endorsed DrFirst iPrescribe as an e-prescription provider for TDA members.

Michael Nash, Ph.D., ABPP

The Role of Hypnotherapy in Pain Control

\$40.00 per person 2 CE hours

Reservations Required prior to 11/12/2020

Though often denigrated as fakery or wishful thinking, hypnosis has been shown to be a real phenomenon with a variety of therapeutic uses—especially in controlling pain.

Michael Nash

Dr. Michael Nash is a Professor Emeritus in Clinical Psychology at The University of Tennessee. He was Editor of the International Journal of Clinical and Experimental Hypnosis for many years. He has published hundreds of research articles on the nature of hypnosis, and how clinicians can empirically track patient improvement. He also has a practice in Clinical Psychology more generally. He has treated many patients referred by dentists for acute and chronic problems associated with dental treatments, phobias, panic and more generally, smoking cessation, and pain. He is also keenly aware of the challenges faced by dentists regarding patient care. In this presentation, Dr. Nash will describe what hypnosis is, and what it is not. He starts with the science, but quickly moves to patient case examples.
